SPECIFICATIONS

Compact disc player

System	Compact disc digital audio system
Laser	Semiconductor laser ($\lambda = 780 \text{ nm}$)
Emission duration	Continuous
Laser output	Max. $44.6 \mu\text{W}$ * This output is the value measured at a distance of 200 mm from the objective lens surface on the Optical Pick-up Block.
Frequency response	2 Hz – 20 kHz $\pm 0.5\text{dB}$
Signal to noise ratio	More than 106 dB
Dynamic range	More than 96 dB
Harmonic distortion	Less than 0.0025%
Wow and flutter	Below measurable limit
Channel separation	More than 100dB

Outputs

LINE OUT (FIXED) (phono jacks)	Output level 2 V (at 50 kilohms) Load impedance over 10 kilohms
LINE OUT (VARIABLE) (phono jacks)	Output level max. 2 V (at 50 kilohms) Load impedance over 50 kilohms
DIGITAL OUT (COAXIAL) (phono jacks)	Output level 0.5 Vp-p (at 75 ohms) Load impedance 75 ohms
DIGITAL OUT (OPTICAL) (optical output connector)	Wave length 660 nm Output level -18 dBm
HEADPHONES (stereo phone jack)	Output level max. 28 mW Load impedance 32 ohms

General

Power requirements	AEP model (CDP-227ESD) 220 V AC (or 240 V AC adjustable by Sony personnel), 50/60 Hz UK model (CDP-227ESD) 240 V AC (or 220 V AC adjustable by Sony personnel), 50/60 Hz US, Canadian model (CDP-507ESD) 120 V AC, 60 Hz E model (CDP-507ESD) 110, 120, 220 or 240 V AC adjustable, 50/60 Hz
Power consumption	22 W
Dimensions (approx.)	430 x 110 x 345 mm (w/h/d) (17 x 4 $\frac{3}{8}$ x 13 $\frac{3}{8}$ inches) including projecting parts and controls
Weight (approx.)	6.3 kg (13 lbs 15 oz)

Supplied accessories

Audio signal connecting cord	1 (2 phono plugs—2 phono plugs)
Remote commander	1
Sony SUM-3 (NS) batteries	2
Screw driver	1

— Continued on page 2 —

COMPACT DISC PLAYER
SONY®

Remote commander

Remote control system	Infrared control
Power requirements	3V DC with two R6 (size AA) batteries
Dimensions	Approx. 62 × 20 × 168.5 mm (w/h/d) (2½ × 1¾ × 6¾ inches)
Weight	Approx. 130 g (5 oz) including batteries

Optional accessory

Optical cable POC-15

Note

This appliance conforms with EEC Directives 76/889 and 82/499 regarding interference suppression.

Features

Custom file function

- **Disc memo function** for writing a comment about a disc.
- **Program bank function** for storing a programmed playing order.
- **Custom index function** for assigning your own index point to any desired position on a disc.

Program play

You can play up to 20 selections in the desired order. Pause can be also programmed. You can also confirm the total playing time while choosing the selection to be programmed.

Variety of playing modes

Single play, program play, shuffle play and repeat play as well as normal continuous play of a whole disc.

Large and easy-to-read window display

Shows the elapsed playing time, the remaining time of the selection being played, the remaining time of the whole disc or the remaining programmed selection numbers. The display contains a music calendar indicating all the numbers of the selections on the disc

Operating Voltage

Before connecting the unit to the power source, check that the operating voltage of your unit is the same as the local power line voltage.

Model	Where purchased	Operating voltage
	AEP model	Operates on 220V AC (or 240V AC adjustable by authorized Sony personnel), 50/60Hz
	UK model	Operates on 240V AC (or 220V AC adjustable by authorized Sony personnel), 50/60 Hz
	Canada model	Operates on 120V AC, 60Hz
	E model	Operates on either 110, 120, 220 or 240V AC, 50/60Hz. The voltage selector is located on the rear panel. If the selector must be reset, disconnect the AC power cord and turn the selector with a coin or a similar object so that the arrow mark of the selector points to the proper voltage figure.

SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY MARK OR DOTTED LINE WITH MARK ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!

LES COMPOSANTS IDENTIFIÉS PAR UNE MARQUE SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR SONY.

MODEL IDENTIFICATION

— Specification Label —

CDP-227ESD (AEP, UK model)

CDP-507ESD (US, Canadian, E model)

**CDP-227ESD**

AEP, UK model: AC 220 – 240 V 50/60 Hz 20W

CDP-507ESD

US, Canadian model: AC 120 V 60 Hz 20W

E model: AC 110, 120, 220 – 240 V 50/60 Hz 20W

CDP-507ESD:

SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety check before releasing the set to the customer:

Check the antenna terminals, metal trim, “metallized” knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

LEAKAGE TEST

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamperes). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instruments.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.
3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The “limit” indication is 0.75 V, so analog meters must have an accurate low-voltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2 V AC range are suitable. (See Fig. A)

Fig. A. Using an AC voltmeter to check AC leakage.

PROTECTION OF EYES FROM LASER BEAM DURING SERVICING

This set employs a laser. Therefore, be sure to follow carefully the instructions below when servicing.

CAUTION

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

1. Laser Diode Properties

- Material: GaAlAs
- Wavelength: 780 nm
- Emission Duration: continuous
- Laser Output: max. 44.6 μ W*

* This output is the value measured at a distance of about 200 mm from the objective lens surface on the Optical Pick-up Block.

2. During service, do not take the Optical Pick-up Block apart, and do not adjust the APC circuit. If there is a breakdown in the APC circuit (including laser diode), replace the entire Optical Pick-up Block (including APC board).

BESKYTTELSE AF ØJNE MOD LASERSTRÅLING UNDER SERVICE

I dette apparat anvendes laserlys. Derfor skal nedenstående instruktioner nøje følges under service.

Følg iøvrigt instruktionerne i servicemanualen.

ADVARSEL!!

Under service må øjnene ikke komme nær objektiv-linsen på den optiske pick-up enhed. I tilfælde af at det er nødvendigt at kontrollere udsendelsen af laserlys, skal det ske i en afstand af mere end 25 cm fra den optiske pick-up.

1. Laser-dioe data

- Materiale: GaAlAs
- Bølgelængde: 780 nm
- Udstråling: Kontinuerlig
- Laseroutput: Max. 0,4 mW*

* Målt i 1,6 mm afstand fra overfladen af objektiv-linsen på den optiske pick-up enhed.

- Klassifikation: Klasse IIIb.

2. Adskil aldrig den optiske pick-up enhed under service, og juster ikke APC kredsløbet (Automatic Power Control). Hvis APC kredsløbet (incl. laser-dioden) bryder ned, skal hele den optiske pick-up enhed (incl. APC printkortet) udskiftes.

LASER ADVARSEL MÆRKNING

Følgende mærkning findes indvendig i apparatet:

1. Advarsel Mærkning

VAROITUS: Laite sisältää, laserdiodin, joka lähettää (näkyvätöntä) silmille vaarallista lasersäteilyä.

SECTION 1 GENERAL

LOCATION AND FUNCTION OF CONTROLS

Front Panel

CDP-227ESD/CDP-507ESD

* AMS is an abbreviation of Automatic Music Sensor.

Remote Commander

—SERVICING NOTE—

MANUAL OPENING OF DISCTABLE

- How to open the disctable manually.
Insert a screwdriver(+) into the B hole on the bottom plate as shown in the figure and turn the loading-pully shaft counter-clockwise, then the disctable will push out slowly.
- Caution on closing the disctable.
The disctable cannot be stored thoroughly in the cabinet, when the optical block is under a chucking state. To recover from the chucking state, turn the driver through the B hole gradually and close the disctable.

REMOVAL OF DISCTABLE

- How to remove the disctable.
Pull out the disctable fully. Press the stoppers down with a precision driver to release the disctable from them and remove it.

NOTES ON HANDLING THE OPTICAL PICK-UP BLOCK OR BASE UNIT

The laser diode in the optical pick-up block may suffer electrostatic breakdown because of the potential difference generated by the charged electrostatic load, etc. on clothing and the human body. During repair, pay attention to electrostatic breakdown and also use the procedure in the printed matter which is included in the repair parts. The flexible board is easily damaged and should be handled with care.

SECTION 2

ADJUSTMENTS

ELECTRICAL ADJUSTMENTS

- Perform adjustments in the order given.
- Use YEDS-18 (8-702-101-01) disc unless otherwise indicated.
- Use the oscilloscope with more than 10 M Ω impedance.

Adjustment Mode

- Connect main board test point ADJ and GND.
(This is to prevent the disc table from opening even though pits are not read, by making micro-computer IC301 pin ⑧ low.)
 - Turn POWER switch on.
(To reset microcomputer.)
- After adjustment, remove the lead wire connecting test points ADJ and GND.

Adjustment Location: main board

Focus Bias Adjustment

This adjustment should be made when replacing optical pick-up.

Procedure:

- Connect oscilloscope to test points RF and RFG.
- Put set into adjustment mode.
- Turn POWER switch on.
- Put disc (YEDS-18) in and press ► button.
- Adjust RV104 for an optimum waveform eye pattern or so that the peak is maximum. Optimum eye pattern means that shape "◇" can be clearly distinguished at the center of the waveform.

Adjustment Location: main board

RF PLL Adjustment

Procedure:

- Connect main board test point ASY and GND.
- Connect the frequency counter to main board test points TP PLCK and TP GND.
- Turn POWER switch ON (stop mode).
- Adjust main board RV201 so that reading on frequency counter is 4.3218 MHz $\pm$ 3 kHz.
- Reconnect lead wires connected in adjustment mode.
- Put disc (YEDS-18) in and press ► PLAY button.
- Confirm that reading on frequency counter is 4.3218 MHz.

Adjustment Location: main board

E-F Balance Adjustment

This adjustment should be made when replacing optical pick-up.

Procedure:

- Connect oscilloscope to test points TEO and GND.
- Put set into adjustment mode.
- Connect TP(TES) to ground.
- Turn POWER switch on.
- Put disc (YEDS-18) in and press ► button.
- Adjust RV101 so that the traverse waveform is symmetrical above and below.
- After adjustment, cancel the adjustment mode.

REFERENCE

Focus/Tracking Gain Adjustment

A frequency response analyzer is necessary in order to perform this adjustment exactly.

However, this gain has a margin, so even if it is slightly off, there is no problem. Therefore, do not perform this adjustment.

Focus/tracking gain determines the pick-up follow-up (vertical and horizontal) relative to mechanical noise and mechanical shock when the 2-axis device operate.

However, as these reciprocate, the adjustment is at the point where both are satisfied.

- When gain is raised, the noise when the 2-axis device operates increases.
- When gain is lowered, it is more susceptible to mechanical shock and skipping occurs more easily.
- When gain adjustment is off, the symptoms below appear.

Symptoms	Gain	Focus	Tracking
• The time until music starts becomes longer for STOP $\rightarrow$ ►PLAY or automatic selection (◀▶ buttons pressed. (Normally takes about 2 seconds.)		low	low or high
• Music does not start and disc continues to rotate for STOP $\rightarrow$ ►PLAY or automatic selection (◀▶ buttons pressed.)		—	low
• Disc table opens shortly after STOP $\rightarrow$ ►PLAY.		low or high	—
• Sound is interrupted during PLAY. Or time counter display stops progressing.		—	low
• More poise during 2-axis device operation.	high	high	high

The following is a simple adjustment method.

Simple Adjustment

Note: Since exact adjustment cannot be performed, remember the positions of the controls before performing the adjustment. If the positions after the simple adjustment are only a little different, return the controls to the original position.

Procedure:

- Keep the set horizontal.
(If the set is not horizontal, this adjustment cannot be performed due to the gravity against the 2 axis device.)
- Put set in adjustment mode.
- Insert disc (YEDS-1) and press ►PLAY button.
- Connect oscilloscope servo board TP FEO.
- Adjustment RV203 so that the waveform is as shown in the figure below. (focus gain adjustment)

- Incorrent Examples (DC level changes more than on adjusted waveform)

REFERENCE

Focus/Tracking Gain Adjustment

A frequency response analyzer is necessary in order to perform this adjustment exactly.

However, this gain has a margin, so even if it is slightly off, there is no problem. Therefore, do not perform this adjustment.

Focus/tracking gain determines the pick-up follow-up (vertical and horizontal) relative to mechanical noise and mechanical shock when the 2-axis device operate.

However, as these reciprocate, the adjustment is at the point where both are satisfied.

- When gain is raised, the noise when the 2-axis device operates increases.
- When gain is lowered, it is more susceptible to mechanical shock and skipping occurs more easily.
- When gain adjustment is off, the symptoms below appear.

Symptoms \ Gain	Focus	Tracking
● The time until music starts becomes longer for STOP → ►PLAY or automatic selection (◀◀ ►►) buttons pressed. (Normally takes about 2 seconds.)	low	low or high
● Music does not start and disc continues to rotate for STOP → ►PLAY or automatic selection (◀◀ ►►) buttons pressed.)	—	low
● Disc table opens shortly after STOP → ►PLAY.	low or high	—
● Sound is interrupted during PLAY. Or time counter display stops progressing.	—	low
● More poise during 2-axis device operation.	high	high

The following is a simple adjustment method.

– Simple Adjustment –

Note: Since exact adjustment cannot be performed, remember the positions of the controls before performing the adjustment. If the positions after the simple adjustment are only a little different, return the controls to the original position.

Procedure:

1. Keep the set horizontal.
 (If the set is not horizontal, this adjustment cannot be performed due to the gravity against the 2 axis device.)
2. Put set in adjustment mode.
3. Insert disc (YEDS-1) and press ► PLAY button.
4. Connect oscilloscope servo board TP FEO.
5. Adjustment RV203 so that the waveform is as shown in the figure below. (focus gain adjustment)

- **Incorrent Examples** (DC level changes more than on adjusted waveform)

6. Connect oscilloscope to main board TP TEO.
7. Adjust RV304 so that the waveform is as shown in the figure below. (tracking gain adjustment)

- **Incorrect Examples** (fundamental wave appears)

SECTION 5

ELECTRICAL PARTS LIST

5. OPTICAL PICK-UP BLOCK (BU-6)

Note:
The components identified by mark Δ or dotted line with mark Δ are critical for safety. Replace only with part number specified.

Note:
Les composants identifiés par une marque Δ sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

Ref.No	Part No.	Description
201	7-685-135-19	SCREW +BTP 2.6X10 TYPE2 N-S

217	*4-917-579-01	GUIDE SHAFT
916	*1-452-411-11	LINEAR MAGNET
917	1-422-302-11	COIL, (DETECT)
918	1-422-301-11	COIL, (DRIVE)
920	A8-848-064-01	OPTICAL PICK-UP BLOCK (KSS-151A)

NOTE:

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- Items marked "*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- If there are two or more same circuits in a set such as a stereophonic machine, only typical circuit parts may be indicated and capacitors and resistors in other same circuits may be omitted.

CAPACITORS:

MF: μ F, PF: μ PF.

RESISTORS

- All resistors are in ohms.
- F: nonflammable

COILS

- MMH: mH, UH: μ H

SEMICONDUCTORS

In each case, U: μ , for example:
UA...: μ A..., UPA...: μ PA...,
UPC...: μ PC, UPD...: μ PD...

The components identified by mark Δ or dotted line with mark Δ are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque Δ sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.
